

# ICT

According to LinkedIn, many of the most sought-after skills by employers are ICT related, including statistical analysis, data presentation, tech design and development, cloud computing, mobile app development, software testing and digital marketing. They also discovered that four of the top five emerging jobs in 2018 were digitally based, including tech developers and engineers.

Waikato has a strong tech sector which is punching above its weight in exports and growth, says CultivateIT, an association committed to bringing together IT talent, industry and community in the region. Hamilton was the New Zealand region with the most tech sector revenue growth in 2017, up 21.7% from the previous year (TIN 100 Report).
